Work Period 04.03.2005 - 03.03.2009

Services provided Architectural and structural analysis
Renovation design
Preparation of tender documents
Site supervision and technical consultancy services

Technical Details In scope of the project, 107 years old building of German School, was renovated, additionally a sports facility been constructed. German School has a capacity of 800 students, with 7000 m² of indoor area and 1500 m² of sports hall.

In design phase, at first, legal permission was taken, afterwards the renovation plan and related analysis were completed, then the documents were prepared for the tender. The construction phase of the project, was implemented in periodic time intervals. Consulting service has been carried out, in every school holidays as 3 months and other off -dates, along 3 years. Although, demolishing and reconstruction brings less expenditure out, in comparison with renovation, due to historical and cultural assessment of the structure, renovation has been accepted as appropriate application.

The project is financed by Ministry of Public Works of Germany.
